

INSTRUCTIONS

- all mares of all breeds, registered or unregistered, must be reported
- all mares bred (not just those in foal) must be listed, with the names of the owners of the mares, and the first and last dates of service

The reports must be filed promptly at the end of the breeding season. If the Stallion Service Report is not filed by December 31st, additional charges will be incurred.

A separate report must be made for each stallion each year.

The stallion owner shall give a completed, signed Service Certificate giving the first and last dates of service to the owner of each mare bred.

Certificates of Registration for foals will not be issued unless both the stallion report and service certificates are on file at Canadian Livestock Records Corporation. The dates and signatures on the two documents must correspond.

If a mare is covered by more than one stallion during the breeding season, service certificates giving the first and last dates of service by both stallions must be furnished.

If a mare is covered by more than one stallion during the same heat period, the parentage of the resulting foal shall be determined by bloodtyping, or DNA genotyping, at the breeder's expense.

When a stallion is pasture bred to a mare, the stallion owner is required to furnish a statement certifying that there was no other stallion in the vicinity which could have covered the mare and giving the date the mare was placed in the pasture with the stallion as well as the date they were separated.

If a mare is Artificially Inseminated with either Fresh or Frozen Semen, the appropriate forms must be included with this report.

When a stallion is leased, a lease application must be filed with the Canadian Livestock Records Corporation.

Please refer to current Fee Schedule for fees for Stallion Reports.
