Information will be kept on file with the NAPA Registrar, and no certificate will be issued for the animal. The information will include owner at birth, unique tattoo, animal birth date, sex, breed composition and pedigree as supplied by the breeder. No DNA Myostatin or Permanent Record Test will be required, and no warranty of the myostatin or pedigree accuracy of the animal will be implied. First Cross animals will be issued a unique ID number by the Registrar, printed on the receipt of work processed. These animals can be assumed to be 1-copy for Myostatin, as they must have one parent fully registered with NAPA carrying 2-copies of the gene. When these First Cross animals produce offspring, the offspring may then be registered or recorded in the Naturean N category bringing forward the breeder's record pedigree as given for the First Cross animal, if the offspring meet the requirements for registry in the Naturean N Category as follows: one parent must be a fully registered or recorded animal; the applicant animal must have the DNA Myostatin Test on file confirming 1 or 2 copies of the Myostatin gene.

\*In the case of First Cross bulls on record-file with the Registrar, they must have the Permanent Record and Myostatin DNA Tests conducted and be properly Recorded in the Naturean N category before any offspring from them can be recorded or registered in any category.

For assistance in completing the application, contact Vicki Johnson at 306-329-8600 or email NAPA@yourlink.ca Website: www.piedmontese.org
