KETCHUM EAR TATTOO EQUIPMENT

What is ear tattooing? Small punctures are made in the ear by means of needles shaped in the form of letters and numbers. Ketchum non-toxic ink is then rubbed into the fresh punctures; the skin heals over the ink and a permanent mark remains. All Ketchum tattoo pliers utilize the "lock-bar" method of character insertion, which allows for prompt, easy interchange of characters.

A complete tattoo outfit contains the plier, the characters 0 to 9, rubber strippers, instructions and a 28 g. tube of green paste tattoo ink. Your herd letters, year letters and any additional required numerals must be specified separately on the order form.

The model 50D plier holds 6 characters 3/16" high; the model 101 holds 6 characters 1/4" high, the model 201A holds 8 characters 5/16" high in 2 rows of four each, the model 201B holds 6 characters 5/16" high in one row, the model 201C holds 4 characters 5/16" high and the model 201R (revolving heard) holds 4 characters on each side 5/16" high.

Complete tattoo outfit: Models 50D and 101	\$104.95
